About Sara

Sara Burgin uses her scientific background and more than 30 years of legal experience to assist clients with issues relating to water use, management and disposal. She advises on permitting, compliance and enforcement matters in association with onshore and offshore wastewater and storm water discharges; issues relating to surface water and ground water rights; water contracts; Spill Prevention, Control and Countermeasures (SPCC) plan requirements and applicability issues; Clean Water Act (CWA) jurisdiction; issues associated with public water systems at industrial facilities; and dredge and fill permit requirements.

In addition to her water experience, Sara has also counseled clients on industrial solid waste matters related to wastewater treatment facilities and recycling/reuse of treated wastewater and/or solids resulting from treatment.

Market sources describe Sara as "a guru," "one of the top-quality water lawyers in the state" (*Chambers USA*, 2018) and "one of the top environment lawyers in the state" (*Chambers USA*, 2021).

Recent Notable Matters

Upstream oil and gas producers — evaluation of the need for SPCC plans and/or facility response plans in specific circumstances and locations

Petroleum refinery — amending a National Pollutant Discharge Elimination System (NPDES) permit authorizing discharge and/or irrigation of refinery wastewater*

NPDES permittees — provide advice and counsel to achieve highest water quality-based permit limits available under applicable state water quality standards

Major oil companies — assistance evaluating compliance with NPDES general permits for discharge from offshore oil and gas facilities*

NPDES permittees — representation in various industries facing federal and state CWA civil enforcement actions and CWA, Section 308 information requests

Energy, chemical and other industrial companies — provision of counsel on applicability of Safe Drinking Water Act requirements related to provision of potable water to employees of industrial facilities

Upstream oil and gas operations — evaluation of available water sources and regulatory requirements, including recycle of produced water, applicable to use of various sources*

Industrial facilities — representation of NPDES permittees in receipt of notice of intent to file citizen suit and negotiation with organization to resolve issues raised by notice and avoid litigation*

NPDES permittees — provision of advice and counsel during renewal and/or amendment of wastewater permits issued by delegated states to respond to objections raised by the U.S. Environmental Protection Agency

Industrial wastewater discharges — provision of advice and counsel on permitting requirements applicable and discharges of storm water associated with construction and industrial activities

Industrial facility — provision of advice and counsel related to sale of water rights and associated amendments of water rights*

Industrial facilities — evaluation of potential regulatory requirements applicable to various wastewater reuse options*

* Work completed prior to Bracewell
