About Tim

Tim's clients rely on him for the defense of environmental enforcement actions and assistance with the environmental aspects of major transactions and project development matters, including siting and permitting. Tim has also overseen environmental compliance audits involving thousands of locations, handled hundreds of environmental audit disclosures and pioneered the development and use of US EPA's audit policy for new owners. Although he undertakes matters in all environmental media, Tim has special depth in issues involving hazardous waste.

His clients report in *Chambers USA* that "he really gets issues and is commercially minded" and that "one of Tim's chief strengths is his ability to explain the law in a way that anyone can understand" (2019). They have also described him as "a very astute lawyer, liked for his quickness and thorough responses" (2007); as having "a good blend of scientific knowledge and legal acumen that helps navigate challenging regulatory issues" (2021); as having "great business acumen and amazing negotiation skills" (2009); and as capable of delivering "practical, cost-effective solutions for his clients" (2011).

In addition to his duties at Bracewell, Tim periodically teaches the course in Corporate Environmental Law at The University of Texas School of Law. Before joining Bracewell, Tim was research assistant to Professor Laurence H. Tribe of Harvard Law School, editor-in-chief of the *Harvard Environmental Law Review*, and a judicial clerk for the Honorable Henry A. Politz, Chief Judge of the United States Court of Appeals for the Fifth Circuit.

Recent Notable Matters

Environmental, Social, and Governance ("ESG") Disclosure and Counseling

Midstream Energy Company — advise liquids pipeline and terminal company on the development of its inaugural ESG report

Numerous Publicly-Traded Companies — advise on climate change- and environmental-related disclosure obligations in connection with required '34 Act disclosures incorporating significant and ongoing developments in SEC guidance, shareholder activism, and other relevant inputs on disclosure respecting those issues

Regulated Electric Utility — issues associated with initial and subsequent sustainability reports including consistency and interplay with required securities disclosures

Texas Upstream Oil and Gas Company — internal ESG information gathering and reporting in support of disclosures to private equity investor as part investor's global ESG review

National Upstream Oil and Gas Company — publicly-traded oil and gas company's voluntary emissions monitoring program and its interplay with voluntary ESG disclosures, mandatory securities disclosures, and regulatory reporting obligations

Multiple Industrial Companies — environmental management systems and overseeing privileged environmental compliance audits and audit disclosures as part of overall governance, compliance assurance, and disclosure validation efforts

Environmental Audits and Transactions

Cactus, Inc. — environmental aspects of the acquisition of FlexSteel Technologies Holdings, Inc. and certain of its affiliates

Phillips 66 — environmental aspects of agreement to sell the Belle Chasse Terminal, formerly the Alliance Refinery, to Harvest Midstream (ongoing)

King Ranch, Inc. — negotiation of a pore space lease and surface use agreement covering approximately 106,000 acres for the development of an industrial scale direct air capture carbon sequestration project in Kleburg County, Texas

Sixth Street — \$700 million acquisition of equity interests in joint venture owning various energy products pipelines and related logistics assets

Major chemical manufacturer — overseeing a five-year company-wide program of privileged environmental compliance audits

Par Pacific Holdings, Inc. — environmental aspects of an acquisition of U.S. Oil & Refining Co. and certain affiliated entities for \$358 million, including a 42,000 bpd refinery and a marine terminal in Tacoma, Washington

Halcón Resources Corporation — environmental aspects of a \$325 million divestiture of water infrastructure assets across the Delaware Basin to a subsidiary of WaterBridge Resources LLC

AP Energy Holdings Inc and South Field Energy LLC — environmental aspects of \$1.3 billion project financing and equity arrangements for the construction of the South Field Energy project, a 1,182 megawatt combined-cycle natural gas electric generating facility located near Wellsville, Ohio

Multiple industrial companies — including new owners of upstream oil and gas, midstream, refineries, chemical manufacturing and distribution, and industrial construction facilities following tens of billions of dollars in acquisitions, in negotiating new owner environmental compliance audit agreements with U.S. EPA, overseeing and administering those compliance audits, preparing extensive audit disclosures to EPA with respect to environmental violations originating pre-acquisition, and resolving those disclosures with EPA without penalty

Various companies — advised on the environmental aspects of numerous acquisitions, divestitures and financing transactions in the energy, refining, electric power, chemicals, telecommunications, real estate, waste handling and municipal sectors

Enforcement Defense

RCRA Enforcement Defense — defended to favorable settlement or dismissal nine federal Resource Conservation and Recovery Act ("RCRA") civil and administrative enforcement actions and noticed RCRA citizen suits since 2018, applying deep knowledge of EPA and State hazardous waste regulations and

guidance, as well as the applicable penalty policies

Midstream Energy Company – represented a major pipeline company in connection with the defense of federal environmental citizen suits and tort claims as well as state agency enforcement and remediation actions arising from a release of drilling fluid to groundwater during pipeline construction

Specialty chemicals manufacturer – successfully defended a sizeable EPA RMP enforcement action involving a newly acquired facility, resulting in the dropping of multiple counts and no penalties

Large chemical manufacturing facility – defended a major hazardous waste, clean water, RMP and TRI enforcement action by U.S. EPA's National Enforcement Investigations Center and Region 6

Houston-area heavy industrial manufacturer – secured the dismissal of all charges against client that had been indicted on three counts of felony water pollution

International terminal company – defended in connection with a stormwater discharge incident that had been referred for criminal prosecution by the Harris County District Attorney, achieving its successful de-referral

Global chemical manufacturing company – defense against a series of EPA Risk Management Plan inspections, information requests, and enforcement actions
