Power Plays: The Case for RNG

August 20, 2021

By: [Martha Kammoun](#), [Brian P. Teaff](#) and [Michael A. Recchia](#)

Growing interest in Renewable Natural Gas plays has our team taking a closer look at the profitability and sustainability merits of making natural gas from animal manure, landfill gas, food waste, or wastewater.

I. What is it?

Renewable Natural Gas (RNG), or biogas, is natural gas that comes from decomposing and purifying organic matter. It can be used for a variety of purposes, including generating electricity and heating for power plants and as various types of fuels. [Click here for the full update.](#)
